

Pedagogy of Language-II (English) (Course - 4)

Assignments & Project Work (NIOS Bridge Course 2025)

Note: TWO (2) tasks are Mandatory for internal assessment. Do ONE from Section A and ONE from Section B: -

SECTION A

Task 1: Critically discuss and write a report on curricular and pedagogic recommendations of NCF-FS 2022 and NCF-SE 2023 for English (or Any L-II/L-III) language education at foundational and preparatory stage.

Solution.

REPORT

1. Introduction

The National Education Policy (NEP 2020) emphasized language as the foundation of learning and cognitive development. In alignment with NEP, the **National Curriculum Framework for the Foundational Stage (NCF-FS 2022)** and the **National Curriculum Framework for School Education (NCF-SE 2023)** present comprehensive guidelines for teaching English or any Second/Third Language (L-II / L-III) at the **Foundational (Ages 3–8)** and **Preparatory Stage (Ages 8–11)**.

Both frameworks promote child-centered, multilingual, play-based and meaning-oriented pedagogy. This report critically examines the major curricular and pedagogic recommendations and discusses their implications, strengths, challenges, and practical considerations in school settings.

2. Key Curricular & Pedagogic Recommendations (From NCF-FS 2022 & NCF-SE 2023)

A. Multilingualism and Primacy of Mother Tongue

- NCF-FS recommends that the medium of instruction must be the child's **home language/mother tongue** during the foundational years.
- Exposure to English (L-II) should be **oral, gradual, and meaningful**, not through formal textbooks.
- NCF-SE supports multilingual classrooms through **translanguaging** and meaningful language transfer.

B. Integrated Development of Language Skills

Both documents emphasise:

- Listening and speaking as the foundation
- Reading and writing growing organically after oral proficiency
- Skills taught in an integrated way, not as separate drills
- “Learning to read” in Foundational years, shifting to “Reading to learn” in Preparatory stage.

C. Play-Based, Activity-Based and Experiential Pedagogy

- Use of stories, rhymes, songs, games, dramatization, pretend play, picture talks, and thematic projects.
- English is introduced through **context-rich interactions** such as classroom instructions, routines, and activities.

D. Phonics Integrated with Meaning

- Both NCFs highlight phonemic awareness and phonics instruction but stress that it must be **playful, meaningful, and connected to comprehension**.
- Phonics is a “tool”, not the main goal.

E. Assessment Reforms

- Focus on **formative**, observation-based, and performance-based assessment.
- Use of checklists, oral tasks, running records, portfolios, reading logs, and observational notes.
- Assessment of speaking and listening receives high priority for L-II.

F. Resources and Teacher Development

- Development of bilingual materials, multilingual storybooks, graded readers, audio resources, and contextual word banks.

- Strong emphasis on **teacher professional development** for multilingual strategies, phonics, scaffolding, and formative assessment techniques.

3. Critical Analysis: Strengths and Limitations

Strengths

1. **Child-centered approach**
Focus on meaning-making, interaction, and playful learning enhances motivation and reduces language anxiety.
2. **Research-backed multilingual pedagogy**
Recognizes that strong mother-tongue foundations significantly improve second-language acquisition.
3. **Holistic assessment**
Moves beyond marks to capture the child's real linguistic abilities through authentic assessment tools.
4. **Integrated learning**
Connecting language with art, games, environment, and other subjects helps natural vocabulary development.
5. **Inclusivity**
Supports children from diverse linguistic backgrounds through scaffolding and translanguaging.

Limitations and Challenges

1. **Teacher Competency Gap**
Implementing multilingual strategies, guided reading, phonics blends, formative assessment, and spoken-language tasks requires high teacher expertise, which is currently uneven.
2. **Material Shortage**
Many schools lack bilingual storybooks, graded readers, and audio-learning resources—especially in rural areas.
3. **Societal Pressure for English Fluency**
Parents often expect rapid English learning; balancing this with NCF's gradual, oral-first approach is challenging.
4. **Classroom Diversity**
Multilingual classrooms require careful planning and individual scaffolding, which adds workload for teachers.
5. **Assessment Implementation Issues**
While portfolios and performance measures are ideal, they can become inconsistent or superficial without training and time.

4. Implications for Teaching English at Foundational and Preparatory Stages

A. Foundational Stage (Ages 3–8 / Grades 1–2)

- English exposure should be **oral-rich**, through songs, rhymes, stories, and meaningful conversations.
- Formal reading/writing should not be rushed.
- Phonemic awareness activities (sound games, listening tasks) prepare the ground for future literacy.
- Assessment should be observational: oral fluency, vocabulary use, interaction patterns.

B. Preparatory Stage (Ages 8–11 / Grades 3–5)

- Transition from basic decoding to **guided reading** and **independent reading**.
- Writing emerges gradually through short sentences, captions, descriptions, and creative work.
- Vocabulary development should be contextual and theme-based.
- Assessment must include running records, reading comprehension tasks, speaking tasks, and portfolios.

5. Recommendations for Effective Implementation

1. Continuous Professional Development (CPD)

Teachers need training in:

- multilingual pedagogy
- guided reading and shared reading
- blending phonics with meaning
- formative and observational assessments
- classroom language management

2. Local Resource Development

Schools should create their own:

- bilingual storybooks
- picture cards
- word walls
- environmental print
- community-based stories

3. Pilot Implementation in Phases

New methods should first be tested on small groups, then scaled up gradually.

4. Parent Awareness Programs

Parents should be sensitized to the importance of mother-tongue learning and the gradual nature of learning English.

5. Structured yet Flexible Assessment System

Simple rubrics, checklists, oral assessment tools, and reading logs must be standardised to help teachers manage evaluation effectively.

6. Equity in Resources

Schools in rural or under-resourced areas must be provided with minimum learning materials and mobile libraries.

6. Teacher's Reflections

As an educator, I find that the NCF's approach to L-II language education is progressive, research-based, and developmentally appropriate. However, its success largely depends on:

- continuous teacher support,
- adequate storybooks and materials,
- classroom autonomy, and
- community involvement.

If implemented with training and patience, these recommendations can transform English learning from a fear-driven process to a joyful, meaningful, and naturally acquired skill.

7. Conclusion

The curricular and pedagogic recommendations of **NCF-FS 2022** and **NCF-SE 2023** provide a strong foundation for English (or any L-II/L-III) education at foundational and preparatory stages. Their emphasis on multilingualism, oral language development, experiential learning, and formative assessment aligns well with the developmental needs of young learners.

Despite the challenges, with proper training, resource allocation, and community awareness, these frameworks can significantly enhance language learning outcomes and help children build strong communication and comprehension skills that support learning across subjects.

Task 2: Critically analyze the present NCERT / state board English (or any L-II) textbook and present a written report. Aspects of analysis should include learning outcomes of L-II, language, content, illustrations, inclusion, stereotypes, assessment etc.

Solution.

REPORT

1. Introduction

Textbooks play a central role in shaping language education in Indian classrooms. For English (or any L-II), textbooks act as structured guides for exposure, practice, vocabulary development, and comprehension building. NCERT and State Boards design textbooks based on the principles of NEP 2020, NCF-FS 2022, and NCF-SE 2023.

However, the real effectiveness of textbooks depends on how well they:

- support learning outcomes,
- use age-appropriate language,
- include meaningful content,
- promote inclusivity,
- avoid stereotypes, and
- integrate assessment.

This report critically analyses the overall features of a present-day NCERT/State Board English L-II textbook for early grades, focusing on its strengths, limitations, and implications for teaching-learning.

2. Learning Outcomes (L-II) – Alignment and Gaps

Strengths

- Textbooks generally align with grade-level learning outcomes such as:
 - listening comprehension
 - oral interaction
 - vocabulary development
 - picture-based reading

- recognition of simple sight words
- early writing tasks (labels, short sentences)
- Activities include read-alouds, recitation, simple comprehension questions, and guided reading elements.

Gaps

- Some learning outcomes—especially oral fluency, interactive speaking, and phonemic awareness—are insufficiently supported.
- Listening activities are limited; there are few tasks that require children to respond to oral stories or dialogues.
- Many textbooks assume decoding abilities too early, especially in Grade 1–2, which contradicts NCF-FS 2022.

Critical View

While textbooks indicate learning outcomes clearly, the pedagogic alignment is not consistent. Activities often remain textbook-driven rather than experiential or oral-rich, which is essential for L-II learners.

3. Language Used in the Textbook

Strengths

- Language is simple, repetitive, and predictable—helpful for early learners.
- Sentence patterns follow a familiar routine ("This is a ...", "I can ...", "We play ...").
- Dialogues and poems encourage rhythm and phonological awareness.

Limitations

- Some chapters include unfamiliar or culturally distant vocabulary for rural or tribal learners.
- Certain texts rely heavily on English-specific idioms or abstract words that young L-II learners cannot meaningfully relate to.
- Phonics progression is inconsistent; decodable texts are not always aligned with skill-building.

Critical View

Language should be developmentally appropriate and contextually meaningful. Many textbooks partially achieve this but still reflect a “one-size-fits-all” linguistic approach.

4. Content Selection and Relevance

Strengths

- Content often includes:
 - nature themes
 - festivals
 - daily activities
 - stories of children, animals, and families
- Interesting poems, short stories, and dialogues create engagement.
- Some units encourage curiosity and imagination.

Limitations

- Certain stories are urban-centric and do not represent rural, tribal, or diverse socio-economic realities.
- Some texts are overly moralistic, reducing opportunities for open-ended thinking.
- Limited integration with environmental studies, art, or real-life tasks (contrary to NCF-SE’s emphasis on integrated learning).

Critical View

The content must reflect **India’s cultural, linguistic, and geographic diversity** more authentically. Children should see themselves and their communities in the textbook.

5. Illustrations – Quality, Inclusiveness & Pedagogic Value

Strengths

- Illustrations are colourful, attractive, and child-friendly.
- Pictures support comprehension, vocabulary, and picture-talk activities.
- Visual cues help in pre-reading and prediction.

Limitations

- Some illustrations lack cultural inclusiveness—e.g., few representations of tribal communities, children with disabilities, or varied economic backgrounds.
- Overly stylized pictures sometimes fail to convey meaning clearly for L-II learners.
- Limited use of sequential images to support story-building and speaking tasks.

Critical View

Illustrations must function not only as decoration but as **meaning-making tools**. They should enhance comprehension and inclusiveness.

6. Inclusion and Representation

Positive Aspects

- Girls and boys are typically shown participating equally in activities.
- Some representation of different religions and regions is visible.
- Attempts to normalize different family structures (single parent, joint family).

Concerns

- Tribal communities, minority groups, and economically marginalized children are underrepresented.
- Children with disabilities (visual, hearing, mobility challenges) rarely appear.
- Rural livelihood practices appear less frequently compared to urban lifestyles.

Critical View

Inclusion is present but **not yet robust**. NCF-SE 2023 emphasizes diversity, but textbooks still need broader representation to make all children feel “visible.”

7. Stereotypes – Presence or Elimination

Strengths

- Gender stereotypes have significantly reduced.
- Both boys and girls are shown in studies, sports, and household work.

Remaining Issues

- Certain chapters still subtly associate girls with domestic roles.
- Traditional, nuclear-family structures dominate illustrations.
- Occupational representation lacks diversity—farmers, artisans, labourers, and tribal occupations are limited.

Critical View

Textbooks need stronger attention to dismantling **gender, class, and cultural stereotypes** through both text and visuals.

8. Assessment Tools Embedded in the Textbook

Strengths

- “Let’s Talk”, “Let’s Read”, “Let’s Write”, and simple comprehension questions provide structured tasks.
- Activities like matching, sequencing, labelling, and picture description promote language processing.
- Some textbooks include project tasks and creative exercises.

Limitations

- Assessment is mainly **end-of-lesson** and not ongoing.
- Oral assessment tools (rubrics for speaking/listening) are missing.
- No provision for portfolio development, reading logs, or teacher observations.
- Overemphasis on writing tasks before oral proficiency is established.

Critical View

Assessment practices should reflect the NCF-FS vision of **observation-based, formative, and oral-rich** evaluation, which textbooks do not adequately provide.

9. Overall Strengths of the Textbook

- Attractive design and engaging illustrations
- Child-friendly poems and short stories
- Age-appropriate vocabulary in most units
- Attempts at integrating environmental concepts and values
- Reduction in gender bias
- Efforts to include activities rather than rote learning

10. Overall Limitations

- Insufficient support for multilingual learning and translanguaging
- Limited oral activities and listening tasks
- Incomplete alignment with foundational language development theories
- Lack of authentic inclusion of diverse Indian identities
- Minimal formative assessment guidance
- Phonics and reading progression not systematically planned

11. Recommendations for Improvement

1. Stronger Multilingual Integration
Use bilingual word banks, local-language stories, and translanguaging strategies.
2. Increase Oral and Listening Activities
Add story-listening, peer conversation, role-play, and dialogue-practice tasks.
3. Culturally-Inclusive Content
Represent rural, tribal, minority, and differently-abled children authentically.

4. Phonics + Meaning Blended Approach

Introduce graded, decodable texts with clear progression.

5. Illustrations That Support Comprehension

Use sequential visuals and culturally relevant imagery.

6. Robust Formative Assessment

Include rubrics, checklists, oral tasks, reading logs, and observation prompts.

7. Reduce Textbook Dependency

Encourage activities linked to real-life experiences—classroom routines, environment, and play-based learning.

12. Conclusion

The current NCERT/State Board English (L-II) textbook offers a reasonably structured and child-friendly approach to language learning. It supports basic literacy, provides engaging content, and makes an effort toward inclusion. However, significant gaps remain in aligning the textbook fully with the vision of **NCF-FS 2022 and NCF-SE 2023**—particularly in multilingual pedagogy, oral-language emphasis, cultural representation, structured phonics, and formative assessment.

To create truly meaningful English learning experiences, textbooks must become more inclusive, more oral-rich, more experiential, and better aligned with developmental needs. Combined with training and supportive pedagogy, such improvements can ensure that textbooks genuinely enhance language learning for all children.

SECTION B

Task 2: Discuss the challenges regarding English language (or any L-II) learning with special reference to your own multilingual Indian classroom. Suggest some strategies to address these challenges.

Solution.

1. Introduction

India's classrooms are naturally multilingual. Children come from diverse linguistic backgrounds—tribal dialects, regional languages, minority languages, and different variations of Hindi or local languages. In such a context, teaching English as an L-II (Second Language) poses unique opportunities as well as challenges.

Based on my own experience of teaching in a multilingual classroom consisting of children speaking Hindi, Bhojpuri, Gondi, Maithili, and Chhattisgarhi, this report highlights the key challenges learners face, followed by effective classroom-tested strategies aligned with the recommendations of NCF-FS 2022 and NCF-SE 2023.

2. Key Challenges in English (L-II) Learning in a Multilingual Classroom

A. Lack of Exposure to English Outside Classroom

Most children in my class rarely hear English at home or in the community. Their world—family, market, friends, playground—is entirely in the home language. Thus English becomes a “school-only language,” limiting natural acquisition.

Impact:

- Difficulty in speaking
- Slow vocabulary development
- Fear or hesitation in oral tasks

B. Limited Oral Foundation Before Reading & Writing

Many children are introduced to English letters and words **before** they develop listening–speaking skills.

Impact:

- Difficulty decoding words
- Weak comprehension
- Memorisation without understanding
- Inconsistent pronunciation

C. Mother-Tongue Interference

Children try to apply rules of their first language to English.

Example from my class:

- Gondi-speaking children add sounds that exist in their home language but not in English.
- Bhojpuri-speaking children struggle with certain consonant clusters.

Impact:

- Pronunciation errors
- Word-order mistakes
- Confusion in grammar patterns

D. Variation in Linguistic Readiness

Different children in my class start with different levels of exposure:

- Some hear Hindi and English at home
- Others hear only local language
- Some are first-generation learners

Impact:

- Mixed-proficiency groups
- Unequal participation
- Some children become passive learners

E. Lack of Age-Appropriate Resources

Schools often lack:

- age-appropriate English storybooks
- bilingual/dual-language readers
- audio resources
- visual materials

Impact:

- Limited opportunities for independent learning
- Over-dependence on the textbook
- Reduced engagement

F. Anxiety, Fear of Mistakes & Low Confidence

English is often seen as a “prestige language,” making children feel judged.

Impact:

- Hesitation in speaking activities
- Avoidance of participation
- Reduced motivation

G. Teacher-Centric Classroom Patterns

Many classrooms follow memorisation-based approaches.

Impact:

- Children do not internalize English naturally
- Listening–speaking skills remain underdeveloped
- Little space for creative expression

3. Strategies to Address These Challenges

Below are classroom-tested strategies that align with NCF recommendations and have worked effectively with my learners.

A. Strengthen Oral Language First (LOP Approach: Listen–Observe–Participate)

Before reading and writing, children must **hear and use English** meaningfully.

Strategies used:

- Daily routine instructions in simple English (“Stand up”, “Line up”, etc.)
- Short conversation circles
- “English speaking partners”
- Songs, rhymes, chants, call-response games

Result:

Children gradually pick up natural phrases and expressions without fear.

B. Use Translanguaging as a Natural Bridge

Instead of banning the home language, I encourage children to use it to understand English concepts.

Examples:

- Explaining new English vocabulary using Hindi/Bhojpuri/Gondi
- Allowing children to discuss in home language first, then share in English
- Bilingual word walls and picture labels

Result:

Better comprehension and lower anxiety.

C. Create a Print-Rich, Multilingual Environment

A visually stimulating classroom helps children absorb English subconsciously.

Examples:

- English–Hindi–local language labels on objects
- Sight-word charts

- Alphabet and sound charts
- Sentence strips and predictable charts

Result:

Improves word recognition and familiarity.

D. Use Stories as the Central Tool for English Learning

Stories are powerful because children connect emotionally.

Strategy:

- Daily read-aloud sessions
- Big books, picture books, teacher-made stories
- Post-story discussions, drawing, sequencing

Result:

Enhances vocabulary, imagination, and comprehension.

E. Phonics Integrated with Meaning

Phonics works best when connected with real contexts.

Approach Used:

- Sound games (I spy, odd one out, sound-hop)
- Blending–segmenting activities
- Introducing phonics through pictures, actions, and stories

Result:

Children decode better and pronounce more clearly.

F. Diversified Group Work to Handle Mixed Proficiency

Children learn well from peers.

Classroom Practices:

- Pair work (strong + weak learner)
- Small reading groups
- Peer teaching circles
- Buddy reading sessions

GURUJI BASIC
EDUCATION

Result:

Builds confidence and ensures inclusive participation.

G. Reduce Fear, Encourage Risk-Taking in Speaking

I create a “mistakes are okay” culture.

Strategies:

- Clapping for every attempt
- No correction during speaking tasks
- Encouraging voluntary participation
- Storytelling without judgment

Result:

Children speak more freely, even if imperfectly.

H. Use Local Culture and Context

Children learn faster when content relates to their life.

Examples:

- Using local festivals, foods, animals in examples
- Creating English stories based on village/city life
- Calling elders to share stories in local language and translating key words

Result:

Children feel represented and connected.

I. Continuous, Formative Assessment

Instead of formal tests, I use observation-based assessment.

Tools used:

- Oral proficiency checklists
- Anecdotal notes
- Picture-description tasks
- Reading logs
- Portfolio of drawings and writing attempts

Result:

Gives a more accurate picture of progress.

4. Teacher's Reflection

Teaching English in a multilingual classroom has taught me that:

- Language learning is emotional as much as cognitive.
- Children learn naturally when English feels meaningful, playful, and pressure-free.
- Allowing children to use their home language enriches—not obstructs—English learning.
- Inclusion, patience, and continuous support matter more than heavy content or strict drills.

NCF-FS 2022 and NCF-SE 2023 rightly emphasize multilingualism, experiential learning, phonological awareness, and oral-language foundations. These principles have greatly improved learning outcomes in my classroom.

5. Conclusion

English (L-II) learning in multilingual Indian classrooms presents real challenges—limited exposure, linguistic interference, anxiety, and lack of resources. However, with thoughtful strategies such as translanguaging, oral-language development, story-based pedagogy, phonics integration, peer learning, and inclusive teaching practices, these challenges can be effectively addressed.

When classrooms respect children's home languages and provide joyful opportunities to speak and explore English, learners not only acquire English naturally but also develop confidence and identity as multilingual speakers.

Task 3: How would you assess oral language at foundational stage? Use any five strategies in your classroom for the assessment and reflect on your experiences with children.

Solution.

1. Introduction

Oral language is the foundation of all later literacy skills—reading, writing, and comprehension. In the Foundational Stage (Grades 1–2), children primarily develop language through listening and speaking, not through textbook-driven tasks. The NCF-FS 2022 emphasizes that assessment should be:

- continuous,
- child-friendly,
- observation-based,

- integrated into daily activities,
- and focused on *how* children use language to express meaning.

In my multilingual classroom, where children speak Hindi, Bhojpuri, Gondi, and Maithili, assessing oral language requires sensitive, contextual, and inclusive methods. Below are five strategies I used along with reflections on children's responses and learning.

2. Strategy 1: Conversation Circle (Talk Circle)

How I Conducted

- Children sat in a circle on the floor.
- A theme was given: "My morning routine", "My favourite food", or "What I did on Sunday".
- Each child spoke for 30–40 seconds.
- I observed their fluency, clarity, vocabulary, and comfort level.

What I Observed (Reflections)

- Children were eager to share personal experiences.
- Initially, hesitant children spoke only 2–3 words, but after multiple sessions, they spoke full sentences.
- Some children used home-language words, which I allowed, then gently scaffolded them with English equivalents.

Outcome

- Self-confidence increased.
- Children learned to express complete thoughts and listen respectfully to peers.

3. Strategy 2: Picture Talk / Picture Description

How I Conducted

- I displayed a large colourful picture (park, market, classroom, animals).
- Asked prompt questions:
 - "What do you see?"
 - "Who is playing?"
 - "What is happening in the picture?"
- Children described objects, actions, and characters.

What I Observed (Reflections)

- Visual stimuli helped both strong and weak learners.
- Children with limited vocabulary pointed and used gestures; gradually, they added simple English words.
- Children showed creativity by inventing small stories from pictures.

Outcome

- Vocabulary and sentence formation improved noticeably.
- This strategy supported multilingual learners because visuals made meaning clear.

4. Strategy 3: Story Retelling / Story Extension

How I Conducted

- I narrated a short story with gestures and voice modulation.
- Asked children to retell the story in their own words.
- With older foundational learners, I stopped the story midway and asked them to predict the ending.

What I Observed (Reflections)

- Children retained key events even if their English was limited.
- A few used home language to express details; I encouraged them and restated their points in English.
- Some children added imaginative twists—showing improved comprehension and creativity.

Outcome

- Listening comprehension improved.
- Children learned sequencing (“first... then... after that...”).
- Increased confidence in speaking longer sentences.

5. Strategy 4: Role Play / Dialogue Practice

How I Conducted

- Created simple scenarios:
 - Shopkeeper–customer
 - Doctor–patient
 - School office interactions
 - Friends meeting at the park
- Provided basic English phrases: “How much?”, “I need...”, “Please give me...”.

What I Observed (Reflections)

- Children loved performing in pairs or groups.
- Even shy learners became active when acting as a “shopkeeper” or “doctor”.
- Students naturally mixed English with their home language, which helped reduce fear and build fluency.

Outcome

- Improved use of real-life phrases.
- Better pronunciation and intonation.
- Enhanced social communication skills.

6. Strategy 5: Peer Talk / Pair Speaking

How I Conducted

- Paired students and gave them topics such as:
 - “Your favourite toy”
 - “Your best friend”
 - “What you like to eat”
- Children discussed freely for 1–2 minutes.
- I moved around, observed, and noted their speaking abilities.

What I Observed (Reflections)

- Children were more relaxed speaking to a friend than in front of the whole class.
- Peer interactions helped weaker learners learn from stronger ones.
- Mixed-language pairs resulted in a natural blend of languages, making English learning less stressful.

Outcome

- Oral fluency improved significantly.
- Children built confidence to speak voluntarily in class activities.

7. My Overall Reflection as a Teacher

Conducting oral language assessment through natural activities rather than tests has been transformative. I observed that:

- Children speak more when they feel safe and unjudged.

- Home language support (translanguaging) makes English learning smoother.
- Oral assessment provides richer information about a child's comprehension, confidence, and thinking abilities than written tests.
- Continuous observation, not formal exams, is the most effective method in the foundational stage.

The NCF-FS 2022 emphasis on *play-based, activity-based, oral-rich* pedagogy is accurate and effective based on my classroom experience.

8. Conclusion

Oral language assessment at the foundational stage must be **natural, joyful, and observation-driven**.
The five strategies –

- Conversation Circle
- Picture Talk
- Story Retelling
- Role Play
- Peer Talk

proved effective in evaluating children's speaking, listening, vocabulary, comprehension, fluency, and confidence.

These strategies also nurture a multilingual classroom by valuing children's home languages while gradually building English proficiency.
